JavaScript, TypeScript, Node, React, Redux, HTML, CSS, Gulp, Babel, Webpack, Azure, AWS services (EC2, ECR, EB, CodePipeline/CodeDeploy, S3), Storybook, Github Actions

Experience

Polk County Government / Full Stack Software Developer
AUGUST 2021 - PRESENT, DES MOINES, IA

Service various offices of county government by identifying user requirements and objectives in order to define problems and develop solutions. Plan and develop applications and related documentation in an Agile project management environment. Manage applications and application resources using Azure cloud management tools.

We Write Code / Full Stack Software Developer
DECEMBER 2019 - AUGUST 2021, DES MOINES, IA

Design and develop full stack web applications on AWS for a variety of clients representing multiple industries. Integrate core AWS services for storage, automated build and deployments, database management, container hosting and more.

National Carwash Solutions / Mobile Software Developer
DECEMBER 2016 - DECEMBER 2019, GRIMES, IA

Develop a cross platform mobile application with a single code-base using React Native. Deliver frequently changing feature requests such as billing generation, inventory management and ordering, network resiliency, etc., in a timely fashion. Use device management software to deliver software and application updates to organization devices, set up new devices, and troubleshoot devices when necessary.

Wells Fargo / Software Developer
2015 - 2016, DES MOINES, IA

Create new solutions and maintain existing applications and websites. Collaborate with project owners to develop requirements and formulate solutions to support internal clients and teams.

Education

Indian Hills Community College / AAS Computer Software
Development

2013 - 2015
